

Abstract

Title

Differences in admission procedures in selected IZS components.

Objectives

The aim of this work is to describe the admission procedures of selected IZS components, such as the Fire Brigade of the Czech Republic, the Police of the Czech Republic, the Customs Administration of the Czech Republic and the Prison Service of the Czech Republic. These components are at the same time so-called "security corpses". After describing the admission procedures, they are then compared.

Methods

The method used in the creation of this final thesis is an analysis of the widest range of literature dealing with the issue. At the end make informations easier to understand and compare them.

Results

An overview of differences in admission procedures in the above-mentioned components.

Key words

Difference, control, components, rescue, system.
